Operation

Setting up the Smart App

1. Download the "TTlock App" from the App Store or Google Play by either
 - Scanning the QR code
 - Searching the "TTlock" app
2. Sign up for a TTlock account, and add the smart lock to the device list

The screenshot shows the 'Register' screen of the TTlock app. At the top, there is a blue header with a back arrow and the word 'Register'. Below the header, there are two tabs: 'Email' (selected) and 'Phone'. The form contains several input fields: 'Enter your Email', 'Password', 'Confirm Password', and 'Verification Code'. A 'Get Code' button is positioned to the right of the 'Verification Code' field. Below the fields, there is a note: 'Your password must have 8-20 characters, and include a minimum of two types of numbers, letters and symbols'. At the bottom, there is a large grey 'Register' button and a link: 'By Registering you agree to our Privacy Policy'.

The screenshot shows the 'Login' screen of the TTlock app. At the top, there is a blue header with the words 'Login' and 'Register'. Below the header, there is a large blue icon of a hand holding a key. The form contains two input fields: 'Phone number/Email' and 'Password'. A 'Login' button is positioned below the 'Password' field. At the bottom, there is a link: 'Forgot Password?'.

You can register an account by your email address or mobile number that is available in 200 countries around the world.

Operation

3. Activate the lock's Bluetooth by touching the Lock's keypad
4. Tap on "+ Add Lock" and select your lock type. Press on "All Locks" if you are not sure.
5. In the "Nearby Locks" list, select the appeared lock. Please make sure you are near the lock in the Bluetooth range.
6. Rename the Lock "Sweet Home, Spain Villa, London Office, ..."

Notice: Generally, the passcode for a lock that has not yet been added is 123456

Bluetooth Unlock

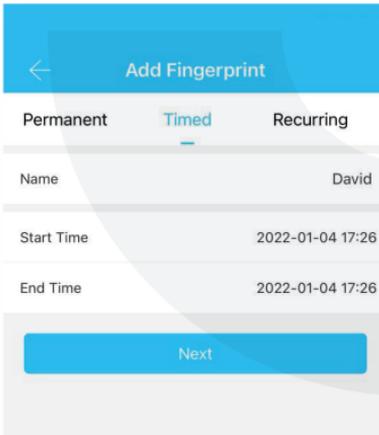

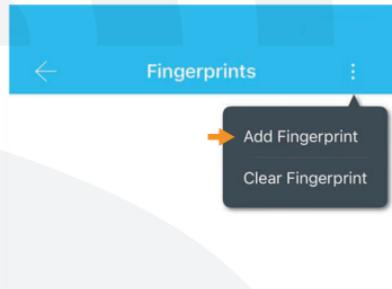

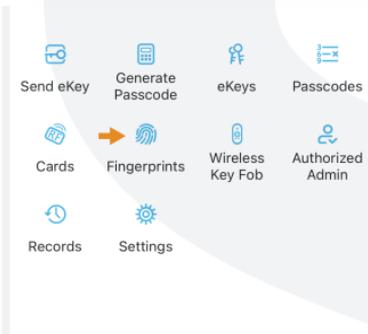

Try to open the lock by tapping on the "Lock Icon". Please ensure there is no problem with Bluetooth communication, and the phone is within the 5-meter range of the Simplified Smart Lock.

Simplified

Add Fingerprints

For adding a new fingerprint,

1. Select Fingerprint from the lock screen in the app
2. Tap on the three dots
3. Select Add Fingerprint
4. Choose a name for later reference "It helps you to recognise the fingerprint in the unlocking reports".
5. Choose whether you want to create limited-time or permanent access.
6. Then start and press your fingerprint 4 times on the fingerprint sensor
7. You should see it is done successfully.
8. Test the fingerprint.

Add Passcodes

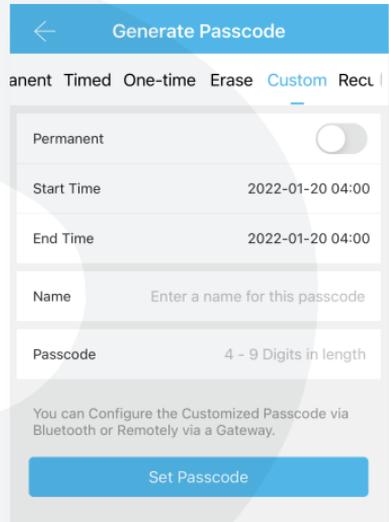

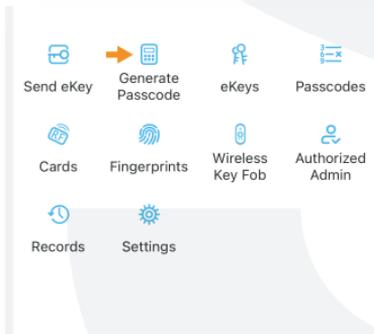

You can create different passcodes types to open the Simplified slim lock: permanent, time-limited, OTP(one-time passcode), cycle or custom. You can easily share the passcode with other users via SMS, Email, WhatsApp.

You can create, limit, share and delete a passcode without a bridge using the app when you are near the lock.

But for example, If you want to eliminate a passcode remotely, you need a Bridge. You can learn more about Bridge features in its section.

Gain access with Passcodes:

1. Touch the keypad with your palm or back of your fingers to wake up the lock.
2. Enter the generated passcode. (Before setting new passcodes, the default code is 123456#)
3. Press #.

Passcode Management

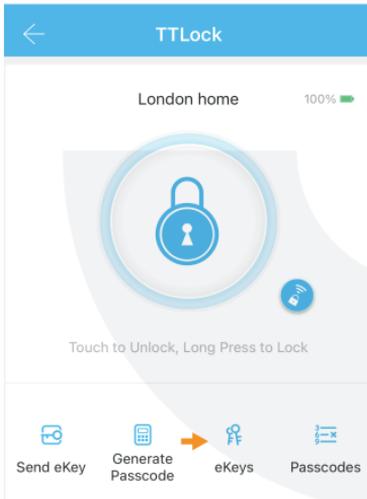

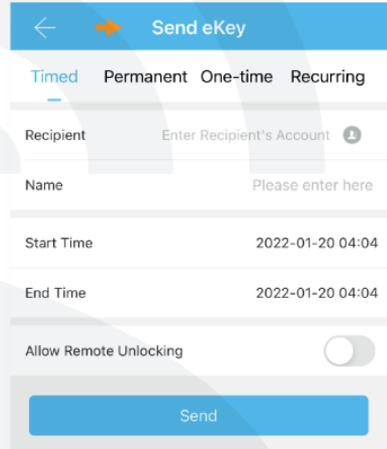

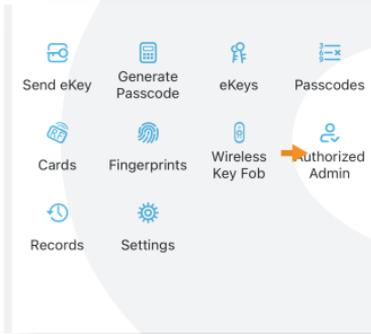

Click on "Passcodes". In this section, the Admin user can

1. Change, delete or reset passcodes.
2. Review the unlock records of passcodes.

Create and Send e-Keys

By selecting the “Send eKey” as shown in the figure, you can create and share an electronic key with your friends, family, maid, dog walker or your AirBnB guests. For using the eKey, they need to download and sign up for a new account. This will also help you find out about the time they opened the lock. E-Keys are also available in different types: Permanent, Time-Limited, One-time and recurring.

You can authorise a user as Admin in the Authorised Admin section

e-Key Management

Click on eKeys. In this section, the Admin user can

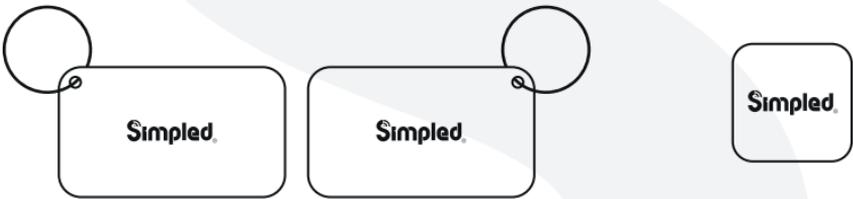

1. reset or delete eKeys.
2. review the access records.

Create Admin

With this feature, you can assign a new timed/ permanent admin to have the same level of access to the lock.

For example, your receptionist or even your guest will be able to add new users and even register their own fingerprint on the smart lock, up to the time their users are valid.

Programme Card, Proximity Fobs, Phone Tag Stickers:

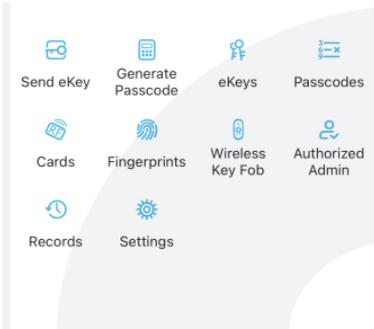

Before a proxy fob or sticker can open the lock, it is required to be programmed first. Fobs/Stickers can also be Permanent or Limited by time.

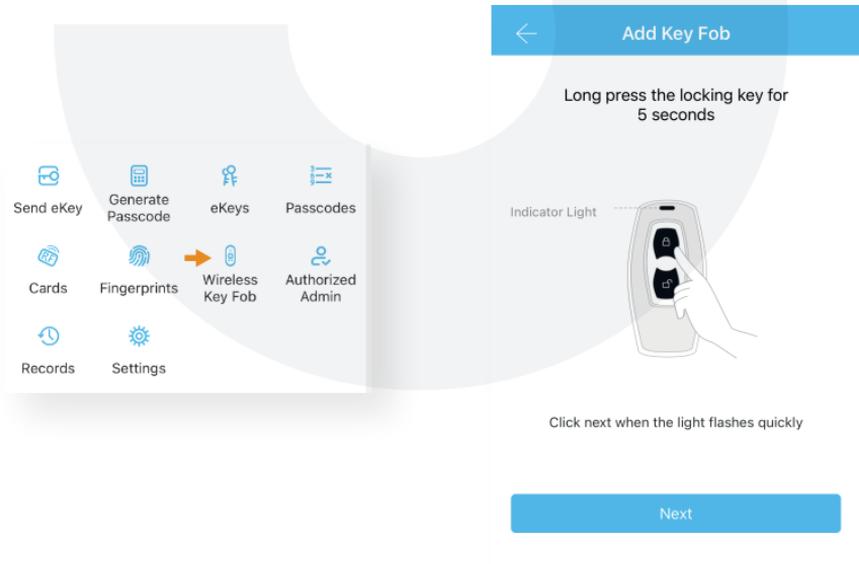

Unlocking Records

Tap on "records". In this part, you can review all the unlock records

Pair Wireless Key Fob (Bluetooth Remote Controller)

1. Tap on "Wireless Key Fob".
2. Add Key Fob
3. Use Permanent/Timed/Recurring Tab.
4. Long Press the Locking Key on the Remote controller for 5 seconds.
5. Tap "Next" when the light flashes quickly.

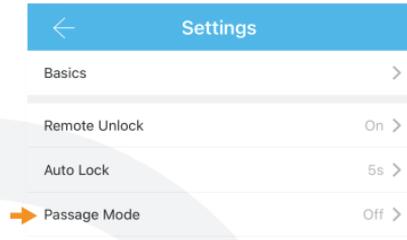

Activate Passage Mode

1. Choose the lock
2. Tap on "Settings"
3. Select "Passage Mode"
4. Turn on this mode and press Save

Note: To activate the passage mode, you need to unlock it once with the app!

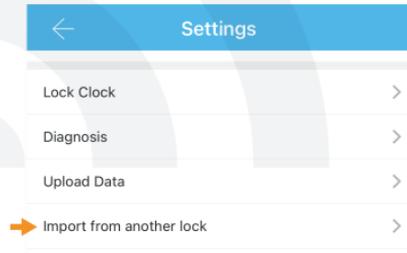

When passage mode is activated, you can long-press # to force-lock the Simplified lock! It's the same when the auto-lock feature is off; you can long-press # to lock the door.

Import data from an old Simplified lock.

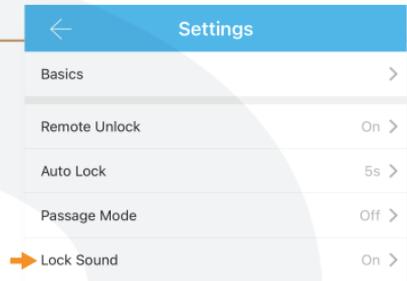

To transfer data from an old Simplified lock to a new one you can follow these steps:

1. Choose the new lock on the app.
2. Tap on "Settings"
3. Select "Import from another lock"
4. Choose your old lock from the list.

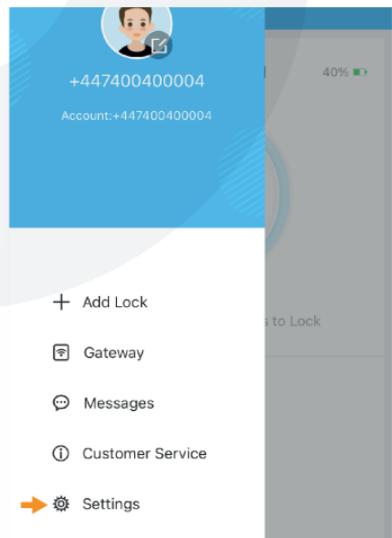

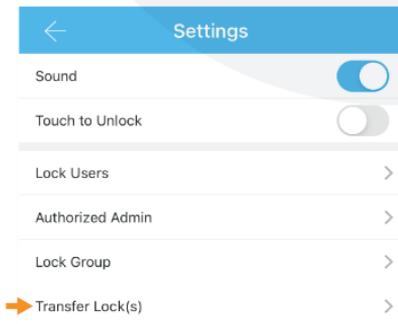

How to turn off/on the lock sound?

1. Open the app.
2. Tap on the lock.
3. Choose "Settings".
4. Disable/Enable the Lock sound.

Transfer lock to a new owner

1. Open the app
 2. Tap on the ☰ (Top Left)
 3. Select "Settings"
 4. Tap on "Transfer Lock(s)"
 5. Select the lock(s) and press Next
 6. Enter the new owner Account, and press Next.
- Notice: The selected lock(s) will be permanently transferred.

WiFi Bridge Pairing

The Simplified Smart WiFi Bridge is a bridge between Simplified Smart locks and WiFi. With the Gateway, you can

- open your lock from anywhere
- remotely read the lock operation records, including, fingerprint, passcodes
- calibrate the lock clock remotely
- remotely delete and modify passcodes
- use the Simplified lock with your Alexa
- use the Simplified lock with your Google home

Light Status

When the WiFi Bridge is powered on:

- Light Flashes alternately in Red and Blue: Stand-by mode, ready for pairing
- Blue light: Working mode
- Red Light: Network failure

Pair the Gateway with APP

1 Activate the APP

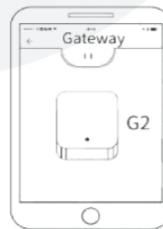

2 Pres "☰"

3 Select (Gateway)

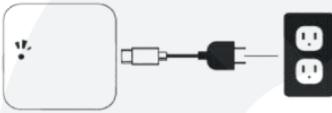

4 Select (G2)

Pair the Gateway with APP

- 5 Plug in the Gateway and power it on, while the light Flashes alternately in red and blue

- 6 Press “+” sign

- 7 Add (Gateway) 8 Select the network and fill in the password

- 9 Add complete

Notice: If times out, please turn off and on, and try it again.

After pairing the WiFi Bridge, please turn on "Remote Unlock" on the TTlock settings.

Scan for more comprehensive TTlock app manual.

FAQ

1. How can I read the operation records?

1. Open the app 2. Select your lock 3. Select "Records"

2. Why can't I unlock the lock after activating the passage mode?

The lock needs to be unlocked once, and only then, the passage mode will be activated.

3. I cannot change the passcode. It says Operation failed.

First, ensure your smartphone is within 2 meters of the cylinder when setting the passcode. If it is, turn off your smartphone's Bluetooth for 10 seconds and turn it on again.

4. After installation, I touched the keypad, but there was no response. What is the reason?

A) Check if the battery is placed correctly and if it has enough power. New Alkaline Batteries are recommended.

B) Remove the back panel and check if the cable is connected properly.

C) Unmount the lock and make sure the cables are not squeezed or damaged.

5. What's the purpose of the Auto-Lock?

To set a timer for the Smart lock to be automatically locked after each time you unlock it.

6. I had a problem registering my fingerprint.

Check if your fingerprints are clean without any dirt or wear. Clean the sensor with a soft cloth making sure there's no oil, stains, etc.

7. What is the reason the batteries ran out?

It can be due to long standby or a Short Circuit caused by a damaged cable.

8. Although the lock recognises my fingerprint, it doesn't function properly?

There are important considerations in the installation section:

1. The spindle should always remain horizontally.

2. Make sure the latch is inside 3. Ensure the Left/Right direction is set correctly on the PCB inside the back panel.

9. What happens if you enter the wrong password into the lock too many times?

After five failed attempts to enter your passcode, your lock will be disabled for 5 minutes. You can try other unlocking methods.
